The Lowdown on Bullies

At some point in our lives many of us will have to deal with a bully. Yet bullies are not all the same. To be able to handle such a threat, it is important to know what kind of person you are dealing with. The most dangerous and common bully is the aggressive one. Aggressive bullies use the fear of violence to control others. Unfortunately, it doesn't stop there. They are known to quickly lose their temper and harm their victims without ever feeling sorry for them. When faced with such a person, immediately tell a parent or teacher. Furthermore, stay in public places and among others for safety. Some people even learn self-defence to protect themselves against this kind of bully. However, violence is not the answer, as it leads to even more violence.

Next, are the verbal bullies. They attack with words and are only happy when others feel hurt. So when an unkind joke is made, show as little reaction as possible and just walk away. Remember, you cannot talk sense to an unreasonable person. And, above all, never make jokes about yourself to prove that nothing can hurt you. This will only encourage them.

Last, is the computer bully. The best way to deal with this menace is by deleting their messages. Do not read anything they write and never send a reply. When faced with such a person, it is wise to seriously consider a change of email address.

Keep in mind that bullies are simply people who envy the talents of their victims. The only way they can feel powerful is by putting others down. Therefore, never listen to anything they have to say!

1. Aggressive bullies later regret hurting someone.

- A. A prominent feature on lively Weybosset Street for nearly a century, the Providence Performing Arts Center occupies the former Loew's Movie Palace. The stunning Beaux Arts theater was designed by George and C.W. Rapp of Chicago, who designed many of the most opulent theaters of the time. The interior is as sumptuous as it was when it opened in 1928, with marble columns, detailed plaster work, a richly ornamented ceiling, and crystal chandeliers. Periodic renovations have modernized its facilities without losing the opulent interior.
- B. On this mile-long street traversing the steep hillside that rises from the river to the Brown University campus, you can see an architectural history of Providence. The Brown University campus crowns **College Hill** and has since 1770; its oldest building and still the center of the campus is University Hall, which served as a barracks and hospital during the Revolution. - F. President John Quincy Adams described the 1786 home of merchant John Brown as "the most magnificent and elegant mansion that I have ever seen on this continent." From its lofty hillside

setting he could keep an eye on his China Trade ships and warehouses at India Point, the source of his considerable wealth.

The first maps were drawn by explorers to help them find their way home and show people where they had been. The maps showed the shape of the land, distances between places and special features such as caves and old trees. Nowadays, maps show the towns and villages, and the roads, railways, rivers and mountains. Symbols are used to show all the different things on a map and there is a key to explain what the symbols stand for.

Over the centuries, people explored most of the Earth and put together the map of the world we use today. Maps of the world or large areas are often either “political” or “physical”. The political map shows territorial borders. The purpose of the physical map is to show features of geography such as mountains, soil type or land use including roads, railroads and buildings.
